EDUCATION

The University of Texas at Austin

Bachelor of Science, Computer Science
Minor: Statistics and Data Science

Dec 2025

Overall GPA: 3.93/4.00

Related Coursework: Data Structures and Algorithms, Operating Systems, Software Engineering, Object-Oriented Programming, Artificial Intelligence, Machine Learning, iOS Mobile Computing

EXPERIENCE

Amazon - Software Development Engineering Intern; Dallas, TX

May 2025 - August 2025

- Developed a Java instrumentation agent that inserts custom logging at application startup, adding 5 GB of contextual data to logs
- Built and deployed a Flask web app on AWS (S3, EC2, CloudFront) with authentication, scaled across teams for log extraction
- Anonymized non-relevant log data with 50+ regex patterns, reducing differences by 90% and accelerating root cause analysis
- Pinpointed performance bottlenecks by implementing a dashboard to visualize method and database operation execution times

Cox Automotive - Software Engineering Intern; Austin, TX

May 2024 - August 2024

- Developed and tested .NET endpoints and Stencil.js web components using agile frameworks, ensuring reliability in production
- Created CI/CD workflows with GitHub Actions to automate staging environment setup and streamline QA processes
- Provisioned AWS infrastructure with Terraform to create a dedicated CloudFront CDN, boosting scalability and performance
- Integrated an enterprise-wide Tailwind design system to modernize web components, standardize UI, and accelerate development

ACADEMIC PROJECTS

Gatherly

Spring 2025

- Engineered an iOS app for party planning in Swift using Xcode and Storyboard, releasing it across alpha, beta, and final phases
- Integrated Firebase Authentication and Firestore for secure user login, real-time data sync, and scalable RSVP management
- Implemented event creation, invitations, and Apple Calendar integration to improve usability within the iOS ecosystem

Texas Trauma Support Website

Spring 2024

- Led a team of 4 to build a React.js app on AWS Amplify and Elastic Beanstalk, providing trauma survivors with support resources
- Automated data collection by programmatically scraping 3 sources with Puppeteer and storing results in a PostgreSQL database
- Developed a RESTful API with Node.js and Flask to deliver 3,500+ support resources, enabling scalable, low-latency data access
- Built comprehensive testing suites with Jest, Selenium, and Postman, integrated into GitLab DevOps pipelines for code quality

Easy Cook

Spring 2024

- Directed a team in a hackathon, coordinating design and development under strict deadlines to deliver a functional prototype
- Built a cross-platform mobile app in Dart with Flutter and OpenAI API to track calories and generate recipes on iOS and Android

Pintos

Fall 2023

- Enhanced an operating system in C by strengthening thread management, user programs, virtual memory, and file systems
- Implemented thread synchronization with locks, semaphores, and condition variables for reliable concurrency and scalability

HONORS

- Eagle Scout – Boy Scouts of America
- National Merit Finalist

SKILLS

- **Computer Programming:** Python, Java, C, C++, C#, JavaScript, TypeScript, HTML, CSS, SQL, Terraform, YAML, Assembly, React.js, Stencil.js, .NET, Flask, Dart, Flutter, Swift
- **Tools:** AWS, Docker, Postman, Swagger, Git, Github Actions, GitLab Pipelines, CI/CD, Visual Studio Code, Bootstrap, Tailwind, Puppeteer, MSTest, Jest, Selenium, Scrum Agile Development, Jupyter Notebook, Matplotlib, Pandas, Sklearn
